

Video Conferencing Support

SKC Managed Services with Partner Maintenance

SKC's Proactive managed platform allows SKC to evaluate your video environment as a whole and develop a customized service solution to help meet your internal business initiatives. Through our Proactive Asset Management, receive 24x7 equipment call monitoring, monthly update alerts, SKC expert staff led software upgrades, and Specialists to establish standardized settings for your technology deployment and push to all equipment on a daily basis. SKC offers Call Management that entails scheduling services, call launching and concierge services for those high profile or large company meetings. SKC will also provide Metric Analysis with monthly reviews to ensure your deployment is being utilized to its fullest. Manufacturer maintenance is required.
